

In the Claims:

Please amend the Claims as follows and without prejudice. This listing of Claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims

Claims 1 – 14 (Cancelled)

15. (Previously Presented) A multi-color electrophoretic image display comprising:

pixels of at least two different colors, the pixels defined by electrophoretic particle-containing cells each having adjacent side-walls being formed on a first electrode, and

a second transparent electrode, separated from said first electrode by a spacer such that the electrophoretic particle-containing cells are in fluid communication with one-another,

wherein the electrophoretic particles, in selected ones of the cells, are partially confined by the side-walls and electrophoretically movable to and from adjacent positions on said transparent second electrode and reflect light entering the display; and light reflected from one of the cells is a different color than light reflected from an adjacent one of the cells.

16. (Original) The display according to claim 15, further comprising a second transparent electrode, the electrophoretic particles in the cells being electrophoretically movable to and from adjacent positions on the transparent second electrode.

17. (Previously Presented) The display according to claim 15, wherein the transparent second electrode includes a multi-color light filter array that filters and thereby colors light reflected by the electrophoretic particles.

Claims 18 - 40. (Cancelled)
